DON'T FORGET TO BOOK YOUR ANNUAL TUNE-UP

## ON DEMAND TANKLESS WATER HEATERS

A good on demand tank-less water heater can lower your monthly expenses and provide you with a never ending source of hot water. In addition, we can usually install your new unit quickly as well as remove your old water heater.

Many of the units we sell qualify for Federal Tax Credits and can be financed with no money down at very low rates.

Today there is really no reason to put up with expensive or low quality hot water. Call us today to find out how these systems can help you save money and enjoy better hot water.

Forget about that messy, inefficient fireplace this winter. Thurston Energy can install a propane fired log set in your existing masonry fireplace that will make your home more comfortable and carefree. Log-sets are a safe and efficient supplemental heat source that can be counted on to work even if the power is out. Imagine coming home to a cozy fire on a cold winter night that starts and stops with the push of a button. No more hauling in logs and dealing with messy ash!

We invite you to explore the possibilities of a propane fired log-set by scheduling your free in-home consultation by calling us at 203-729-5274

## PAYING TOO MUCH FOR ELECTRICITY?

Recently electricity has been partially deregulated which allows consumers the ability to choose the company they wish to provide their electricity.

By now you may have noticed two categories on your CL&P statement. One part deals with distribution-this part cannot be changed. The second part is the piece we can change. You are now able to choose who generates your electricity.

The good news is that Thurston has partnered with Positive Energy, Inc. to provide you with lower cost electricity. The average customer, who uses about 800 kilowatts monthly, can save about 240 dollars a year!

Enrollment in the program is simple and completely free. Just log on to: [www.thurstonoil.com](http://www.thurstonoil.com) or call us at (203)729-5274 and we can help you enroll.

If your oil tank is rusty, leaning, leaking, has sludge, is over 40 years old or smells bad it might be time to look into a new one. For around \$65.00 per month and no money down, we can install a new oil tank complete with all piping, labor and disposal of the old one. It is a small price to pay for the security a new oil storage system will bring you.

Call us today for a free tank evaluation
